

XI. Immortality

Wilt thou not ope thy heart to know
What rainbows teach, and sunsets show?
Verdict which accumulates
From lengthening scroll of human fates,
Voice of earth to earth returned,
Prayers of saints that inly burned,—
Saying, What is excellent,
As God lives, is permanent;
Hearts are dust, hearts' loves remain;
Heart's love will meet thee again.

Mute orator! well skilled to plead,
And send conviction without phrase,
Thou dost succor and remede
The shortness of our days,
And promise, on thy Founder's truth,
Long morrow to this mortal youth.

Monadnoc

In the year 626 of our era, when Edwin, the Anglo-Saxon king, was deliberating on receiving the Christian missionaries, one of his nobles said to him: "The present life of man, O king, compared with that space of time beyond, of which we have no certainty, reminds me of one of your winter feasts, where you sit with your generals and ministers. The hearth blazes in the middle and a grateful heat is spread around, while storms of rain and snow are raging without. Driven by the chilling tempest, a little sparrow enters at one door and flies delighted around us till it departs through the other. Whilst it stays in our mansion it feels not the winter storm; but when this short moment of happiness has been enjoyed, it is forced again into the same dreary tempest from which it had escaped, and we behold it no more. Such is the life of man, and we are as ignorant of the state which preceded our present existence as of that which will follow it. Things being so, I feel that if this new faith can give us more certainty, it deserves to be received."

In the first records of a nation in any degree thoughtful and cultivated, some belief in the life beyond life would of course be suggested. The Egyptian people furnish us the earliest details of an established civilization, and I read in the second book of Herodotus this memorable sentence: "The Egyptians are the first of mankind who have affirmed the immortality of the soul." Nor do I read it with less interest that the historian connects it presently with the doctrine of metempsychosis; for I know well that where this belief once existed it would necessarily take a base form for the savage and a pure form for the wise;—so that I only look on the counterfeit as a proof that the genuine faith had been there. The credence of men, more than race or climate, makes their manners and customs; and the history of religion may be read in the forms of sepulture. There never was a time when the doctrine of a future life was not held. Morals must be enjoined, but among rude men moral judgments were rudely figured

under the forms of dogs and whips, or of an easier and more plentiful life after death. And as the savage could not detach in his mind the life of the soul from the body, he took great care for his body. Thus the whole life of man in the first ages was ponderously determined on death; and, as we know, the polity of the Egyptians, the by-laws of towns, of streets and houses, respected burial. It made every man an undertaker, and the priesthood a senate of sextons. Every palace was a door to a pyramid: a king or rich man was a *pyramidaire*. The labor of races was spent on the excavation of catacombs. The chief end of man being to be buried well, the arts most in request were masonry and embalming, to give imperishability to the corpse.

The Greek, with his perfect senses and perceptions, had quite another philosophy. He loved life and delighted in beauty. He set his wit and taste, like elastic gas, under these mountains of stone, and lifted them. He drove away the embalmers; he built no more of those doleful mountainous tombs. He adorned death, brought wreaths of parsley and laurel; made it bright with games of strength and skill, and chariot-races. He looked at death only as the distributor of imperishable glory. Nothing can excel the beauty of his sarcophagus. He carried his arts to Rome, and built his beautiful tombs at Pompeii. The poet Shelley says of these delicately carved white marble cells, "They seem not so much hiding places of that which must decay, as voluptuous chambers for immortal spirit." In the same spirit the modern Greeks, in their songs, ask that they may be buried where the sun can see them, and that a little window may be cut in the sepulchre, from which the swallow might be seen when it comes back in the spring.

Christianity brought a new wisdom. But learning depends on the learner. No more truth can be conveyed than the popular mind can bear, and the barbarians who received the cross took the doctrine of the resurrection as the Egyptians took it. It was an affair of the body, and narrowed again by the fury of sect; so that grounds were sprinkled with holy water to receive only orthodox dust; and to keep the body still more sacredly safe for resurrection, it was put into the walls of the church; and the churches of Europe are really sepulchres. I read at Melrose Abbey the inscription on the ruined gate:—

"The Earth goes on the Earth glittering with gold;
The Earth goes to the Earth sooner than it wold;
The Earth builds on the Earth castles and towers;
The Earth says to the Earth, All this is ours."

Meantime the true disciples saw, through the letter, the doctrine of eternity, which dissolved the poor corpse and nature also, and gave grandeur to the passing hour. The most remarkable step in the religious history of recent ages is that made by the genius of Swedenborg, who described the moral faculties and affections of man, with the hard realism of an astronomer describing the suns and planets of our system, and explained his opinion of the history and destiny of souls in a narrative form, as of one who had gone in a trance into the society of other worlds. Swedenborg described an intelligible heaven, by continuing the like employments in the like circumstances as those we know; men in societies, in houses, towns, trades, entertainments; continuations of our earthly experience. We shall pass to the future existence as we enter into an agreeable dream. All nature will accompany us there. Milton anticipated the leading thought of Swedenborg, when he wrote, in "Paradise Lost,"—

“What if Earth
Be but the shadow of Heaven, and things therein
Each to the other like more than on earth is thought?”

Swedenborg had a vast genius and announced many things true and admirable, though always clothed in somewhat sad and Stygian colors. These truths, passing out of his system into general circulation, are now met with every day, qualifying the views and creeds of all churches and of men of no church. And I think we are all aware of a revolution in opinion. Sixty years ago, the books read, the sermons and prayers heard, the habits of thought of religious persons, were all directed on death. All were under the shadow of Calvinism and of the Roman Catholic purgatory, and death was dreadful. The emphasis of all the good books given to young people was on death. We were all taught that we were born to die; and over that, all the terrors that theology could gather from savage nations were added to increase the gloom. A great change has occurred. Death is seen as a natural event, and is met with firmness. “A wise man in our time caused to be written on his tomb, “Think on living.” That inscription describes a progress in opinion. Cease from this antedating of your experience. Sufficient to to-day are the duties of to-day. Don't waste life in doubts and fears; spend yourself on the work before you, well assured that the right performance of this hour's duties will be the best preparation for the hours or ages that follow it:

“The name of death was never terrible
To him that knew to live.”

A man of thought is willing to die, willing to live; I suppose because he has seen the thread on which the beads are strung, and perceived that it reaches up and down, existing quite independently of the present illusions. A man of affairs is afraid to die, is pestered with terrors, because he has not this vision, and is the victim of those who have moulded the religious doctrines into some neat and plausible system, as Calvinism, Romanism, or Swedenborgism, for household use. It is the fear of the young bird to trust its wings. The experiences of the soul will fast outgrow this alarm. The saying of Marcus Antoninus it were hard to mend: “It is well to die if there be gods, and sad to live if there be none.” I think all sound minds rest on a certain preliminary conviction, namely, that if it be best that conscious personal life shall continue, it will continue; if not best, then it will not: and we, if we saw the whole, should of course see that it was better so. Schiller said, “What is so universal as death, must be benefit.” A friend of Michel Angelo saying to him that his constant labor for art must make him think of death with regret,—“By no means,” he said; “for if life be a pleasure, yet since death also is sent by the hand of the same Master, neither should that displease us.” Plutarch, in Greece, has a deep faith that the doctrine of the Divine Providence and that of the immortality of the soul rest on one and the same basis. Hear the opinion of Montesquieu: “If the immortality of the soul were an error, I should be sorry not to believe it. I avow that I am not so humble as the atheist; I know not how they think, but for me, I do not wish to exchange the idea of immortality against that of the beatitude of one day. I delight in believing myself as immortal as God himself. Independently of revealed ideas, metaphysical ideas give me a vigorous hope of my eternal well-being, which I would never renounce.”

I was lately told of young children who feel a certain terror at the assurance of life without end. "What! will it never stop?" the child said; "what! never die? never, never? It makes me feel so tired." And I have in mind the expression of an older believer, who once said to me, "The thought that this frail being is never to end is so overwhelming that my only shelter is God's presence." This disquietude only marks the transition. The healthy state of mind is the love of life. What is so good, let it endure.

I find that what is called great and powerful life—the administration of large affairs, in commerce, in the courts, in the state,—is prone to develop narrow and special talent; but, unless combined with a certain contemplative turn, a taste for abstract truth, for the moral laws, does not build up faith or lead to content. There is a profound melancholy at the base of men of active and powerful talent, seldom suspected. Many years ago, there were two men in the United States Senate, both of whom are now dead. I have seen them both; one of them I personally knew. Both were men of distinction and took an active part in the politics of their day and generation. They were men of intellect, and one of them, at a later period, gave to a friend this anecdote. He said that when he entered the Senate he became in a short time intimate with one of his colleagues, and, though attentive enough to the routine of public duty, they daily returned to each other, and spent much time in conversation on the immortality of the soul and other intellectual questions, and cared for little else. When my friend at last left Congress, they parted, his colleague remaining there; and, as their homes were widely distant from each other, it chanced that he never met him again until, twenty-five years afterwards, they saw each other through open doors at a distance in a crowded reception at the President's house in Washington. Slowly they advanced towards each other as they could, through the brilliant company, and at last met,—said nothing, but shook hands long and cordially. At last his friend said, "Any light, Albert?" "None," replied Albert. "Any light, Lewis?" "None," replied he. They looked in each other's eyes silently, gave one more shake each to the hand he held, and thus parted for the last time. Now I should say that the impulse which drew these minds to this inquiry through so many years was a better affirmative evidence than their failure to find a confirmation was negative. I ought to add that, though men of good minds, they were both pretty strong materialists in their daily aims and way of life. I admit that you shall find a good deal of skepticism in the streets and hotels and places of coarse amusement. But that is only to say that the practical faculties are faster developed than the spiritual. Where there is depravity there is a slaughter-house style of thinking. One argument of future life is the recoil of the mind in such company,—our pain at every skeptical statement. The skeptic affirms that the universe is a nest of boxes with nothing in the last box. All laughter at man is bitter, and puts us out of good activity. When Bonaparte insisted that the heart is one of the entrails, that it is the pit of the stomach that moves the world,—do we thank him for the gracious instruction? Our disgust is the protest of human nature against a lie.

The ground of hope is in the infinity of the world; which infinity reappears in every particle, the powers of all society in every individual, and of all mind in every mind. I know against all appearances that the universe can receive no detriment; that there is a remedy for every wrong and a satisfaction for every soul. Here is this wonderful thought. But whence came it? Who put it in the mind? It was not I, it was not you; it is elemental,—belongs to thought and virtue, and whenever we have either we see the beams of this light. When the Master of the universe has points to carry in his government he impresses his will in the structure of minds.

But proceeding to the enumeration of the few simple elements of the natural faith, the first fact that strikes us is our delight in permanence. All great natures are lovers of stability and permanence, as the type of the Eternal. After science begins, belief of permanence must follow in a healthy mind. Things so attractive, designs so wise, the secret workman so transcendently skilful that it tasks successive

generations of observers only to find out, part with part, the delicate contrivance and adjustment of a weed, of a moss, to its wants, growth, and perpetuation; all these adjustments becoming perfectly intelligible to our study,—and the contriver of it all forever hidden! To breathe, to sleep, is wonderful. But never to know the Cause, the Giver, and infer his character and will! Of what import this vacant sky, these puffing elements, these insignificant lives full of selfish loves and quarrels and ennui? Everything is prospective, and man is to live hereafter. That the world is for his education is the only sane solution of the enigma. And I think that the naturalist works not for himself, but for the believing mind, which turns his discoveries to revelations, receives them as private tokens of the grand good-will of the Creator.

The mind delights in immense time; delights in rocks, in metals, in mountain-chains, and in the evidence of vast geologic periods which these give; in the age of trees, say of the Sequoias, a few of which will span the whole history of mankind; in the noble toughness and imperishableness of the palm-tree, which thrives under abuse; delights in architecture, whose building lasts so long,—“A house,” says Ruskin, “is not in its prime until it is five hundred years old,”—and here are the Pyramids, which have as many thousands, and cromlechs and earthmounds much older than these.

We delight in stability, and really are interested in nothing that ends. What lasts a century pleases us in comparison with what lasts an hour. But a century, when we have once made it familiar and compared it with a true antiquity, looks dwarfish and recent; and it does not help the matter adding numbers, if we see that it has an end, which it will reach just as surely as the shortest. A candle a mile long or a hundred miles long does not help the imagination; only a self-feeding fire, an inextinguishable lamp, like the sun and the star, that we have not yet found date and origin for. But the nebular theory threatens their duration also, bereaves them of this glory, and will make a shift to eke out a sort of eternity by succession, as plants and animals do.

And what are these delights in the vast and permanent and strong, but approximations and resemblances of what is entire and sufficing, creative and self-sustaining life? For the Creator keeps his word with us. These long-lived or long-enduring objects are to us, as we see them, only symbols of somewhat in us far longer-lived. Our passions, our endeavors, have something ridiculous and mocking, if we come to so hasty an end. If not to be, how like the bells of a fool is the trump of fame! Nature does not, like the Empress Anne of Russia, call together all the architectural genius of the Empire to build and finish and furnish a palace of snow, to melt again to water in the first thaw. Will you, with vast cost and pains, educate your children to be adepts in their several arts, and, as soon as they are ready to produce a masterpiece, call out a file of soldiers to shoot them down? We must infer our destiny from the preparation. We are driven by instinct to have innumerable experiences which are of no visible value, and we may revolve through many lives before we shall assimilate or exhaust them. Now there is nothing in nature capricious, or whimsical, or accidental, or unsupported. Nature never moves by jumps, but always in steady and supported advances. The implanting of a desire indicates that the gratification of that desire is in the constitution of the creature that feels it; the wish for food, the wish for motion, the wish for sleep, for society, for knowledge, are not random whims, but grounded in the structure of the creature, and meant to be satisfied by food, by motion, by sleep, by society, by knowledge. If there is the desire to live, and in larger sphere, with more knowledge and power, it is because life and knowledge and power are good for us, and we are the natural depositaries of these gifts. The love of life is out of all proportion to the value set on a single day, and seems to indicate, like all our other experiences, a conviction of immense resources and possibilities proper to us, on which we have never drawn.

All the comfort I have found teaches me to confide that I shall not have less in times and places that I do not yet know. I have known admirable persons, without feeling that they exhaust the possibilities of virtue and talent. I have seen what glories of climate, of summer mornings and evenings, of midnight sky; I have enjoyed the benefits of all this complex machinery of arts and civilization, and its results of comfort. The good Power can easily provide me millions more as good. Shall I hold on with both hands to every paltry possession? All I have seen teaches me to trust the Creator for all I have not seen. Whatever it be which the great Providence prepares for us, it must be something large and generous, and in the great style of his works. The future must be up to the style of our faculties,—of memory, of hope, of imagination, of reason. I have a house, a closet which holds my books, a table, a garden, a field: are these, any or all, a reason for refusing the angel who beckons me away,—as if there were no room or skill elsewhere that could reproduce for me as my like or my enlarging wants may require? We wish to live for what is great, not for what is mean. I do not wish to live for the sake of my warm house, my orchard, or my pictures. I do not wish to live to wear out my boots.

As a hint of endless being, we may rank that novelty which perpetually attends life. The soul does not age with the body. On the borders of the grave, the wise man looks forward with equal elasticity of mind, or hope; and why not, after millions of years, on the verge of still newer existence?—for it is the nature of intelligent beings to be forever new to life. Most men are insolvent, or promise by their countenance and conversation and by their early endeavor much more than they ever perform,—suggesting a design still to be carried out; the man must have new motives, new companions, new condition, and another term. Franklin said, “Life is rather a state of embryo, a preparation for life. A man is not completely born until he has passed through death.” Every really able man, in whatever direction he work,—a man of large affairs, an inventor, a statesman, an orator, a poet, a painter,—if you talk sincerely with him, considers his work, however much admired, as far short of what it should be. What is this Better, this flying Ideal, but the perpetual promise of his Creator?

The fable of the Wandering Jew is agreeable to men, because they want more time and land in which to execute their thoughts. But a higher poetic use must be made of the legend. Take us as we are, with our experience, and transfer us to a new planet, and let us digest for its inhabitants what we could of the wisdom of this. After we have found our depth there, and assimilated what we could of the new experience, transfer us to a new scene. In each transfer we shall have acquired, by seeing them at a distance, a new mastery of the old thoughts, in which we were too much immersed. In short, all our intellectual action, not promises but bestows a feeling of absolute existence. We are taken out of time and breathe a purer air. I know not whence we draw the assurance of prolonged life, of a life which shoots that gulf we call death and takes hold of what is real and abiding, by so many claims as from our intellectual history. Salt is a good preserver; cold is: but a truth cures the taint of mortality better, and “preserves from harm until another period.” A sort of absoluteness attends all perception of truth,—no smell of age, no hint of corruption. It is self-sufficing, sound, entire.

Lord Bacon said: “Some of the philosophers who were least divine denied generally the immortality of the soul, yet came to this point, that whatsoever motions the spirit of man could act and perform without the organs of the body, might remain after death; which were only those of the understanding, and not of the affections; so immortal and incorruptible a thing did knowledge seem to them to be.” And Van Helmont, the philosopher of Holland, drew his sufficient proof purely from the action of the intellect. “It is my greatest desire,” he said, “that it might be granted unto atheists to have tasted, at least but one only moment, what it is intellectually to understand; whereby they may feel the immortality of the mind, as it were by touching.” A farmer, a laborer, a mechanic, is driven by his

work all day, but it ends at night; it has an end. But, as far as the mechanic or farmer is also a scholar or thinker, his work has no end. That which he has learned is that there is much more to be learned. The wiser he is, he feels only the more his incompetence. "What we know is a point to what we do not know." A thousand years,—tenfold, a hundredfold his faculties, would not suffice. The demands of his task are such that it becomes omnipresent. He studies in his walking, at his meals, in his amusements, even in his sleep. Montesquieu said, "The love of study is in us almost the only eternal passion. All the others quit us in proportion as this miserable machine which holds them approaches its ruin." "Art is long," says the thinker, "and life is short." He is but as a fly or a worm to this mountain, this continent, which his thoughts inhabit. It is a perception that comes by the activity of the intellect; never to the lazy or rusty mind. Courage comes naturally to those who have the habit of facing labor and danger, and who therefore know the power of their arms and bodies; and courage or confidence in the mind comes to those who know by use its wonderful forces and inspirations and returns. Belief in its future is a reward kept only for those who use it. "To me," said Goethe, "the eternal existence of my soul is proved from my idea of activity. If I work incessantly till my death, nature is bound to give me another form of existence, when the present can no longer sustain my spirit."

It is a proverb of the world that good-will makes intelligence, that goodness itself is an eye; and the one doctrine in which all religions agree is that new light is added to the mind in proportion as it uses that which it has. "He that doeth the will of God abideth forever." Ignorant people confound reverence for the intuitions with egotism. There is no confusion in the things themselves. The health of the mind consists in the perception of law. Its dignity consists in being under the law. Its goodness is the most generous extension of our private interests to the dignity and generosity of ideas. Nothing seems to me so excellent as a belief in the laws. It communicates nobleness, and, as it were, an asylum in temples to the loyal soul.

I confess that everything connected with our personality fails. Nature never spares the individual; we are always balked of a complete success: no prosperity is promised to our self-esteem. We have our indemnity only in the moral and intellectual reality to which we aspire. That is immortal, and we only through that. The soul stipulates for no private good. That which is private I see not to be good. "If truth live, I live; if justice live, I live," said one of the old saints, "and these by any man's suffering are enlarged and enthroned."

The moral sentiment measures itself by sacrifice. It risks or ruins property, health, life itself, without hesitation, for its thought, and all men justify the man by their praise for this act. And Mahomet in the same mind declared, "Not dead but living ye are to account all those who are slain in the way of God."

On these grounds I think that wherever man ripens, this audacious belief presently appears,—in the savage, savagely; in the good, purely. As soon as thought is exercised, this belief is inevitable; as soon as virtue glows, this belief confirms itself. It is a kind of summary or completion of man. It cannot rest on a legend; it cannot be quoted from one to another; it must have the assurance of a man's faculties that they can fill a larger theatre and a longer term than nature here allows him. Goethe said: "It is to a thinking being quite impossible to think himself non-existent, ceasing to think and live; so far does every one carry in himself the proof of immortality, and quite spontaneously. But so soon as the man will be objective and go out of himself, so soon as he dogmatically will grasp a personal duration to bolster up in cockney fashion that inward assurance, he is lost in contradiction." The doctrine is not sentimental, but is grounded in the necessities and forces we possess. Nothing will hold but that which we must be and must do:—

“Man's heart the Almighty to the Future set
By secret but inviolable springs.”

The revelation that is true is written on the palms of the hands, the thought of our mind, the desire of our heart, or nowhere. My idea of heaven is that there is no melodrama in it at all; that it is wholly real. Here is the emphasis of conscience and experience; this is no speculation, but the most practical of doctrines. Do you think that the eternal chain of cause and effect which pervades nature, which threads the globes as beads on a string, leaves this out of its circuit,—leaves out this desire of God and men as a waif and a caprice, altogether cheap and common, and falling without reason or merit?

We live by desire to live; we live by choice; by will, by thought, by virtue, by the vivacity of the laws which we obey, and obeying share their life,—or we die by sloth, by disobedience, by losing hold of life, which ebbs out of us. But whilst I find the signatures, the hints and suggestions, noble and wholesome,—whilst I find that all the ways of virtuous living lead upward and not downward,—yet it is not my duty to prove to myself the immortality of the soul. That knowledge is hidden very cunningly. Perhaps the archangels cannot find the secret of their existence, as the eye cannot see itself;—but, ending or endless, to live whilst I live.

There is a drawback to the value of all statements of the doctrine, and I think that one abstains from writing or printing on the immortality of the soul, because, when he comes to the end of his statement, the hungry eyes that run through it will close disappointed; the listeners say, That is not here which we desire;— and I shall be as much wronged by their hasty conclusions, as they feel themselves wronged by my omissions. I mean that I am a better believer, and all serious souls are better believers in the immortality, than we can give grounds for. The real evidence is too subtle, or is higher than we can write down in propositions, and therefore Wordsworth's “Ode” is the best modern essay on the subject.

We cannot prove our faith by syllogisms. The argument refuses to form in the mind. A conclusion, an inference, a grand augury, is ever hovering, but attempt to ground it, and the reasons are all vanishing and inadequate. You cannot make a written theory or demonstration of this as you can an orrery of the Copernican astronomy. It must be sacredly treated. Speak of the mount in the mount. Not by literature or theology, but only by rare integrity, by a man permeated and perfumed with airs of heaven,—with manliest or womanliest enduring love,—can the vision be clear to a use the most sublime. And hence the fact that in the minds of men the testimony of a few inspired souls has had such weight and penetration. You shall not say, “O my bishop, O my pastor, is there any resurrection? What do you think? Did Dr. Channing believe that we should know each other? did Wesley? did Butler? did Fénelon?” What questions are these! Go read Milton, Shakspeare, or any truly ideal poet. Read Plato, or any seer of the interior realities. Read St. Augustine, Swedenborg, Immanuel Kant. Let any master simply recite to you the substantial laws of the intellect, and in the presence of the laws themselves you will never ask such primary-school questions.

Is immortality only an intellectual quality, or, shall I say, only an energy, there being no passive? He has it, and he alone, who gives life to all names, persons, things, where he comes. No religion, not the wildest mythology dies for him; no art is lost. He vivifies what he touches. Future state is an illusion for the ever-present state. It is not length of life, but depth of life. It is not duration, but a taking of the soul out of time, as all high action of the mind does: when we are living in the sentiments we ask no questions about time. The spiritual world takes place;—that which is always the same. But see how the

sentiment is wise. Jesus explained nothing, but the influence of him took people out of time, and they felt eternal. A great integrity makes us immortal; an admiration, a deep love, a strong will, arms us above fear. It makes a day memorable. We say we lived years in that hour. It is strange that Jesus is esteemed by mankind the bringer of the doctrine of immortality. He is never once weak or sentimental; he is very abstemious of explanation, he never preaches the personal immortality; whilst Plato and Cicero had both allowed themselves to overstep the stern limits of the spirit, and gratify the people with that picture.

How ill agrees this majestic immortality of our religion with the frivolous population! "Will you build magnificently for mice? Will you offer empires to such as cannot set a house or private affairs in order? Here are people who cannot dispose of a day; an hour hangs heavy on their hands; and will you offer them rolling ages without end? But this is the way we rise. Within every man's thought is a higher thought,—within the character he exhibits to-day, a higher character. The youth puts off the illusions of the child, the man puts off the ignorance and tumultuous passions of youth, proceeding thence puts off the egotism of manhood, and becomes at last a public and universal soul. He is rising to greater heights, but also rising to realities; the outer relations and circumstances dying out, he entering deeper into God, God into him, until the last garment of egotism falls, and he is with God,—shares the will and the immensity of the First Cause.

It is curious to find the selfsame feeling, that it is not immortality, but eternity,—not duration, but a state of abandonment to the Highest, and so the sharing of His perfection,—appearing in the farthest east and west. The human mind takes no account of geography, language, or legends, but in all utters the same instinct.

Yama, the lord of Death, promised Nachiketas, the son of Gautama, to grant him three boons at his own choice. Nachiketas, knowing that his father Gautama was offended with him, said, "O Death! let Gautama be appeased in mind, and forget his anger against me: this I choose for the first boon." Yama said, "Through my favor, Gautama will remember thee with love as before." For the second boon, Nachiketas asks that the fire by which heaven is gained be made known to him; which also Yama allows, and says, "Choose the third boon, O Nachiketas!" Nachiketas said, there is this inquiry. Some say the soul exists after the death of man; others say it does not exist. This I should like to know, instructed by thee. Such is the third of the boons. Yama said, "For this question, it was inquired of old, even by the gods; for it is not easy to understand it. Subtle is its nature. Choose another boon, O Nachiketas! Do not compel me to this." Nachiketas said, "Even by the gods was it inquired. And as to what thou sayest, O Death, that it is not easy to understand it, there is no other speaker to be found like thee. There is no other boon like this." Yama said, "Choose sons and grandsons who may live a hundred years; choose herds of cattle; choose elephants and gold and horses; choose the wide expanded earth, and live thyself as many years as thou listeth. Or, if thou knowest a boon like this, choose it, together with wealth and far-extending life. Be a king, O Nachiketas! On the wide earth I will make thee the enjoyer of all desires. All those desires that are difficult to gain in the world of mortals, all those ask thou at thy pleasure;—those fair nymphs of heaven with their chariots, with their musical instruments; for the like of them are not to be gained by men. I will give them to thee, but do not ask the question of the state of the soul after death." Nachiketas said, "All those enjoyments are of yesterday. With thee remain thy horses and elephants, with thee the dance and song. If we should obtain wealth, we live only as long as thou pleasest. The boon which I choose I have said." Yama said, "One thing is good, another is pleasant. Blessed is he who takes the good, but he who chooses the pleasant loses the object of man. But thou, considering the objects of desire, hast abandoned them. These two, ignorance (whose object is what is pleasant) and knowledge (whose object is what is good), are known to be far asunder, and to lead to different goals. Believing this world exists, and not the

other, the careless youth is subject to my sway. That knowledge for which thou hast asked is not to be obtained by argument. I know worldly happiness is transient, for that firm one is not to be obtained by what is not firm. The wise, by means of the union of the intellect with the soul, thinking him whom it is hard to behold, leaves both grief and joy. Thee, O Nachiketas! I believe a house whose door is open to Brahma. Brahma the supreme, whoever knows him obtains whatever he wishes. The soul is not born; it does not die; it was not produced from any one. Nor was any produced from it. Unborn, eternal, it is not slain, though the body is slain; subtler than what is subtle, greater than what is great, sitting it goes far, sleeping it goes everywhere. Thinking the soul as unbodily among bodies, firm among fleeting things, the wise man casts off all grief. The soul cannot be gained by knowledge, not by understanding, not by manifold science. It can be obtained by the soul by which it is desired. It reveals its own truths.”
